End of Term 2 NEWSLETTER - Osogbo Campus

Date: 1st April, 2026.

Dear Esteemed Parents, Guardians, and Stakeholders,

End of Term 2.

As we draw the curtain on Term 2 of the 2025/2026 Academic Session today, we return all glory to Almighty God for His grace, protection, and guidance throughout this term. His faithfulness has seen us through academic challenges, daily school activities, and major school event *{Inter-House Sports Festival}* with great success.

Appreciation to Our Parents and Stakeholders.

We sincerely appreciate you, our dear parents and stakeholders, for your unwavering support, cooperation, and trust in our vision. Your consistent partnership has played a vital role in the academic progress, character development, and overall well-being of our Students. We do not take your commitment for granted, and we look forward to even stronger collaboration in the coming term.

Easter Break and Holiday Coaching for Year 9 & Year 12 Students.

Let's kindly note that Year 9 and Year 12 Students will also proceed on Easter Break, but will have only the Easter Festival period off before resuming for their Holiday Coaching Classes. Year 12 Students will resume Tutorial Classes on Wednesday, 8th April while Year 9 Students will resume on Monday, the 13th. These sessions are crucial for preparing them adequately for forthcoming external examinations, and we enjoin all parents to ensure full attendance.

Registration for External Examinations.

Registration processes have commenced for interested candidates for the November/December Diet of Cambridge *Checkpoints*, Cambridge *IGCSE*, and American Scholastic Assessment Test (*SAT*). Parents and guardians who wish for their children/wards to participate are kindly advised to contact the school promptly *{on WhatsApp - 08081555652}* for necessary guidance and completion of registration procedures.

Progress in our Hybrid Learning Program.

One of the notable highlights of this Session is the significant improvement in our Hybrid Learning Program, which seamlessly integrates physical classroom instructions with structured digital learning platforms. We have strengthened our digital infrastructure, improved access to learning resources, and enhanced teacher capacity to deliver engaging, technology-driven lessons. This initiative started in Term 1, and still continues in Term 3 to ensure learning continuity, flexibility, and relevance in an increasingly digital world.

Students' Learning Development in the Digital Space.

Our Students are demonstrating commendable growth in digital literacy, independent learning, critical thinking, and responsible use of technology. Through guided online activities, interactive platforms, and project-based digital tasks, our learners are becoming more confident and competent in navigating modern learning environments. These skills are essential for global competitiveness and lifelong

learning. The ongoing Digital SAT Coaching classes are part of this greatness; where the participants are being exposed to various Critical Thinking Questions for global acceptance.

Implementation of Full CBT Examinations.

We are glad to report that Term 1 and Term 2 Examinations in all our Classes {Primary & College}, were conducted fully via Computer-Based Testing (CBT). The exercises were seamless, well-coordinated, and successfully executed. Students and Pupils adapted excellently to the CBT environment, showcasing not only academic preparedness but also improved computer proficiency and examination confidence. This milestone further affirms our School's readiness to embrace global best practices in assessment.

Digital Learning - Laptop Requirement.

In line with our commitment to delivering a robust and technology-driven learning experience, all parents, who are yet to do so, are enjoined to provide functional laptops for their children/wards ahead of Term 3. This is essential for the full implementation of our blended curriculum package, which integrates both digital and classroom learning. As we appreciate those who have gotten for their wards, we pray the Lord God continue to bless and provide for you all, especially those who are still planning for the purchase.

Student's claim to personal Laptop is crucial for accessing their Digital Exam Questions, and more importantly, reviewing and correcting them after the Exams. This is a great opportunity for Learners to assess their understanding, identify areas for improvement, and boost their performance.

Using Modern Digital Tools make reading fun and help Learners to improve on their Skills and Confidence. At GOF International Schools, we are not only making reading enjoyable but also preparing our Learners to thrive in the Digital World.

Our Policy on Sports:

Sports play a big role in shaping Learners in both Primary and Secondary Schools. That is why we engage all our Pupils and Students at GOF International Schools in Sports every week.

Physically, Sports will help our Learners stay active, improving fitness, coordination, and overall health. In the aspect of Teamwork and Social Skills, working with teammates teaches collaboration, communication, and problem-solving. Discipline-wise and in Time Management, balancing Sports with Academics promotes responsibility and organization. Apart from all these, achievements in Sports will enhance self-esteem and motivation, and as well, help to reduce stress and improve focus in class.

As a result, we enjoin our valued Parents to ensure the children get to School at least 7:15 a.m. every Friday as we resume Term 3 on April 27 by God's Grace.

Morning Assembly.

In the just concluded Term 2, the School Management noticed that some of our Parents bring their wards late to School in the morning, making some of the Learners miss the Morning Assembly or join half way.

Let's kindly be informed that Everyday School Activities begin on the Morning Assembly; and here are some of the reasons why a Learner must not miss the Morning Assembly:

- i} It boosts confidence and public speaking skills in the Learners;
- ii} It fosters a sense of belonging and community among Learners;
- iii} It encourages discipline, punctuality, and teamwork in them;
- iv} It provides a platform to showcase talents among them;
- v} It also helps develop leadership skills, especially among the Prefects and Class Captains; and
- vi} It sets a positive tone for the day {*because most of the rules and regulations guiding the Learners' obligations and limitations would be well stated*}.

Digital Tech Competition:

We are excited to announce the successful performance of our Student Representatives at **Tech+ Journey Program**, a hands-on learning experience designed to introduce Students to essential technology skills and practical digital tools. Over the past months, our learners have shown outstanding commitment, creativity, and enthusiasm.

During the closing session ONLINE early this year, several Students from different International Schools distinguished themselves through exceptional performance, teamwork, and consistent participation.

To the Glory of God, five (5) Students from GOF International Schools, Osogbo were among the Top Performers, by name *Juwon Odemo & Nifemi Adebayo {Yr 11}* and *Harmony Ogunfunminiyi, Taiwo Ogundeji & Glory Oyetunji {Year 12}*.

These Students received Certificates of Excellence and some special gifts in recognition of their Tech Prowess and Excellence throughout the program. Other participating Students, by name Adesewa Oni, Faithia Ajao, and Dorcas Omidiji, all in Year 11, received Certificate of Completion.

We are proud of these eight (8) Students who took part in the **Tech+ Journey**. The growth, curiosity, and problem-solving skills displayed by them reflect the bright potential we see in them. A big thank you to the School Management and Parents for the steady support. Together, we look forward to even more learning opportunities ahead.

Entrance Examinations for 2026/2027 Session:

Our Entrance Examinations into Yrs 7 & 8 and Yrs 10 & 11 are scheduled to hold on the following dates:

Batch A – *Saturday, April 25th, 2026;*

Batch B – *Saturday, May 23rd, 2026;* and

Batch C – *Saturday, June 20th, 2026.*

Let's kindly inform interested families, friends, relatives, and prospective candidates accordingly.

Conclusion:

As we round off this Term, we encourage all our Students to make the most of the holiday by resting adequately while also engaging in meaningful academic revision and personal development activities.

- Holiday Project work shall be forwarded to all Students via their respective Class Platforms.
- All Parents shall get the links to their wards' RESULTS by next week.
- Also, Parents would come for their wards' Envelopes on Friday, 10th April, 2026.
- All Yr 9 and Yr 12 Students shall be coming to School in their Uniform during the Holiday Coaching.

We look forward to welcoming our Learners back, refreshed and ready for greater accomplishments in *Term 3* as we *resume full Academic Activities on Monday, 27th April, 2026*. We wish all our valued Parents and Stakeholders a peaceful and joyous Easter celebration in advance. May the season bring renewed hope, happiness, and abundant blessings to every home.

With warm regards,

Segun O. Ola-Fabiyi, Esq.

School Principal.
